Mr. K. J. Schiller  
Staff Manager  
AT&T Long Lines - Room 207  
201 Littleton Road  
Morris Plains, NJ 07950

Dear Mr. Schiller:

Once again, it is time to prepare the network for the countries that are to be added to the list of those accessed by the IDDD/IOTC dialing arrangement.

This letter is therefore, a request for you to be sure to implement the required network changes in time to allow for end offices and TSPS to make their changes and perform the necessary tests.

The countries are Iceland and Uruguay but we are also listing MARISAT for the Atlantic, Pacific, and Indian oceans. Believe me, the last three are not new countries or any other political entities. The name is a combination of "maritime" and "satellite" and represents a new high seas service provided over satellite links.

The details are as follows:

Country	Country Code	Paired Code	Number of Digits	1st Stage Outpulsing	ISC
ICELAND	374	854	8 - 9	011 + 854	NYCMNYBW24T
MARISAT (ATLANTIC)	871	101	7 - 9	011 + 101	NYCMNYBW24T
MARISAT (INDIAN)	873	103	7 - 9	011 + 103	DNVRCOZJ05T
MARISAT (PACIFIC)	872	102	7 - 9	011 + 102	DNVRCOZJ05T
URUGUAY	598	288	9 - 10	011 + 288	PITBPADG43T

Toll switching systems should have these changes implemented by January 16, 1982. The TSPS and end office changes should be effected by February 6, 1982. Testing should be completed by February 21, 1982 which is the date that the service to these places will be opened. Recommendation Letter 81-11-210 has been issued on this subject and has an error in the attachment on the test numbers. MARISAT - Indian is 873+ and Pacific is 872+.

Please make sure that those responsible for the end offices (if not yourself) are aware of these changes. As always, if you have any questions, call me on 201-221-4759.
